

Web & Mobile Based Knowledge Portal

Project Requirement & Quotation Document

Date: 08 April 2026

1. Project Overview

This project includes the development of a Web and Mobile Based Knowledge Portal where the client will provide content such as videos, PDF manuals, book PDFs, images, and other digital learning materials. Users will be able to access the knowledge content through an internet browser and dedicated mobile applications.

2. Scope of Work

2.1 Web Admin Portal Development

- A fully responsive web portal will be developed with the following features:
- Admin panel for content management
- Upload videos, PDFs, books, and images
- User registration and login system
- Category-wise content management
- Filter functionality
- Secure content access
- Hosting and deployment on live server

2.2 Mobile Application Development

- Mobile applications will be developed for:
- Android Platform
- Apple iOS Platform

3. Admin Panel Features

- Dashboard with total users and content statistics
- Upload and manage videos
- Upload and manage PDF books and manuals
- Create and manage content categories
- User management (add, edit, block users)
- Content approval and updates

4. Hosting & Deployment

- Web portal hosting on live server
- Domain configuration
- Android app publishing on Google Play Store
- iOS app publishing on Apple App Store
